

# Welcome to the instructional manual for *The Town Crier* announcement aggregation program.

## Summary

Not being able to hear announcements is an age old problem for all students. By using this system, the announcements, both in school and after school in clubs, will be displayed in an easy to read and visual format.

**Follow these instructions to effectively use this system, whether you are first starting it, or restarting it.**

To run or restart the program, double click the `run.command` file.

## Options

The system takes tweets from the twitter accounts defined in the `usernames.txt` file. You may add or take away names as you wish. Make sure the usernames are each on their own line.
